

## Capabilities Statement

Fleet Aeronautics was established in 2011 to meet the growing need in the Australian aviation industry for independent weight control consulting services. Since then, we have grown as a unique aerospace engineering consultancy company specialising in Flight Engineering services to the aviation industry.

### Capabilities

---

- **CASA approved Weight Control Authority**
- **Aircraft Weighing Services**
- **Scale Hire** – from small aircraft to Boeing 777.
- **Loading System Development, Testing and Approval**
- **iPad and PC Loading Systems**
- **iPad EFB Systems**
- **Flight Performance Engineering Services**
- **Aircraft Weight and Balance Training**
- **Flight Engineering Consultancy**

### Differentiators

---

- **Experienced in all aspects of weight control engineering**
- **Precision platform scales and load cells** – providing safer aircraft weighing with increased accuracy, and faster turnaround.
- **Fully customised iPad software applications**
- **Innovative cost effective solutions**

### Past Performance

---

- **Loading System development, testing and approval for all Aircraft and Rotorcraft types**
- **Airline Fleet Weight Systems**
- **Airline Empty Weight and ELA Monitoring Systems**
- **Flight planning and performance engineering**
- **Load Controller and Flight Crew Weight & Balance Training**
- **21M Approved Structural Modifications**

### Company Facts

- Established in 2011
- CASA approved Weight Control Authority
- Leading experts in aircraft weight and balance
- Specialists in customised loading systems for iPad.

### Our Mission

To provide a competitive choice to airlines and the aviation industry for flight engineering solutions. We are dedicated to applying our skills to implement technology that improves the safety, capability and cost effectiveness of our client's operations.
